ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite): A wetland delineation was received at the Waukesha office for review and concurrence.

The wetland delineation identified 1 wetland complex with a surface area of approximately 1.3 acres on the 1.5 acre parcel. A review of the aerial photography and the local topographic mapping available on the Waukesha County IMS indicate that the subject wetland lacks a surface water connection or adjacency to a water of the US and is therefore, isolated on the landscape. Connections between the wetland and interstate commerce were also considered but could not be identified. Therefore, the subject wetland is an isolated waterbody that would not be subject to Corps Section 404 jurisdiction.
